The Ritz-Carlton, Harbin has officially made its debut as an exemplary luxury hotel under Mariott Bonvoy. Crowning the top floors of the Harbin Fuli Center's main building, it boasts spectacular views of the Songhua River and the winter wonderland that Harbin has to offer. The 270-meter tall building has redrawn the urban skyline and become a new landmark in the "Ice City". The building of Ritz-Carlton, Harbin was designed by the renowned American firm Leo A Daly, and the cracking ice on the Songhua River inspired the building's façade, making it an iconic landmark in the city. Following the cultural roots of the North, the hotel begins a vibrant chapter for premium luxury hotels in the city of ice with exploratory design and immersive experience of the local area.

冰雪北境之上的避世桃源

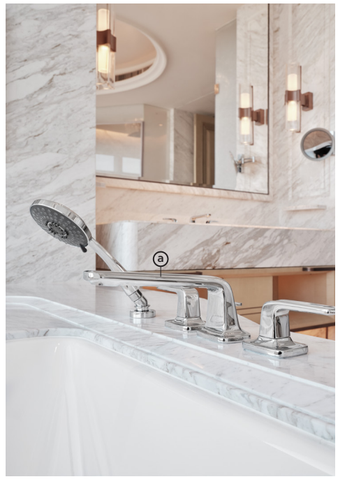

An Escape to Oasis in the Icy North

哈尔滨富力丽思卡尔顿酒店由屡获殊荣的设计公司 HBA 担纲公共空间和客房的设计，餐饮空间则由专注高端奢华设计的 AB Concept 打造。哈尔滨兼具俄罗斯和中国文化历史的多元影响，因此，酒店的室内设计风格凸显了这种强烈的文化碰撞，并从哈尔滨这座城市的文化中汲取设计灵感，在对当地文化和地域的认知与尊重的基础之上，以奢华典雅的设计完美诠释冰雪之城的多元文化之美。极富层次的大理石面板、精挑细琢的铜艺金属、暖色的木制贴面，搭配色泽鲜明且具有现代感的颜色点缀，以明快柔和的基调为宾客缔造奢华雅致且充满高尚气息的避世桃源。

The public spaces and guest rooms at the Ritz-Carlton, Harbin were designed by award-winning design firm Hirsch Bedner Associates, while AB Concept created the dining spaces. Harbin combines the diverse influences of Russian and Chinese cultures and histories. Therefore, the hotel's interior design style highlights the intense cultural collision, drawing inspiration from the local customs of Harbin. It perfectly interprets this city of ice and snow's multicultural beauty with a luxurious and elegant design based on knowledge and respect for the local culture and region. Layered marble panels, finely crafted brass metals, warm wood veneers, and contemporary color accents create a place of luxury getaway for the guests.
